**DETAILED ACTION**

1. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. Claims 1-20 are pending. Paired notched Belleville springs are conventional.
4. The submitted prior art and submitted International Search Report have been considered.
5. Applicants' US 6,739,410 and US 2004/0113340 A1 are made of record.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3683

7. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by submitted EP 0240810 to Orth et al or submitted JP 10054432 to Okuma.

Note serrations/grooves at vicinity 40, 42, 30, 32, 21, 22, 20 in Figs. 1-4 of Orth et al. See Figs. 8, 10, 11, 12 of Okuma.
